LOCAL JOTTINGS.

We received this week from Messrs Max and Johnstone, two miles east of here, a sample of oats over five feet high

Strathmore school opens again on 22nd August, having been closed since the end of June for the holidays

Rev. McCaskill, of Bassano, will preach to Strathmore Presbyterians on Sunday forenoon

Another sign that matters are not so bad as was at one time thought. The Presbyterians had decided to postpone the building of their new church till next year, on account of unfavorable crop reports, but now they have taken a second thought, and decided to go ahead with it

We have announced that strathmore Sports were to be held, on various dates during the last three months, but they have always been postponed for some reason or other. We have got rather sick of it, as we do not want to lay ourselves open to a charge of publishing misleading information. However, we have been asked to announce that the Sports will positively come off on Labor Day, September 5. We hope it's right this time, but we won't vouch for its being correct

Apocryph of the above, we understand there was a balance of \$65 over from last year's Sports. This was applied to the purchase of uniforms for this year's baseball team. During the season the team have played three matches

A large number of cattle have been shipped from here this week

Remember the Cheapest Prices on FENCING and Supplies, Bars and Smooth WIRE, Scales of all kinds, will be found at C. W. CHASE. Insurance promptly attended to

Miss Dorothy Johnson is spending the week with Rev. T. W. Castie

An auction sale of farm stock and implements belonging to F. Baeten, on S.E. quarter Sec. 35, Tp. 24, Range 44, about 10 miles northwest of Strathmore, will take place Monday, August 15, commencing at 2 p.m. For particulars see bills—A. Clemens, Auctioneer

Mr W. A. Rothwell, who has been doing the publicity work for the C.P.I. company, is returning to newspaper work, and is now editor of the publications of the Western Canada Publishing Company and of the Western Canada Trade Gazette. Mr Rothwell is well and favorably known in Strathmore having visited here often in connection with C.P.I.C. business

At the Demonstration Farm the other day a local record was established, one man milking 50 cows in 38 minutes with the new milking machine

Mr A. Gray desires to thank the people of Strathmore for their sympathy in the death of his five month-old daughter, Agnes Jane, and for their attendance at the funeral

Mr W. E. Brown is at present on a visit to Vancouver

Mrs McIntosh and Miss McIntosh came in from the Rosebud on Saturday

J. A. Johnson, St. Edward, Nebraska, was here Saturday

Dr Fowler and the other members of the Irricana baseball team, arrived here on Saturday from Bassano, and drove out to their home town on Sunday

P. Johansen, G. Diggins, and T. Burns, of Star City, were here on Monday

F. E. Renaud, Gleichen, was here Tuesday

Mr and Mrs T. L. Chamberlain were in town Wednesday

Chas. E. Lasher, Calgary; Thos. Laing and W. H. Osbury, New Mexico, N.Y., were among the visitors here on Thursday

Mr Henry L. Fitts arrived last week from the States with his family, Mrs Fitts, Mr Joseph Fitts, and Miss Ruth Fitts. They will spend the summer at their prairie home, Mountain View Farm

Dr. Merritt, late of Ottawa, is at present assisting Dr. Girvin. The latter is going to Banff for a few days

A stranger seeing a middle-aged man going around Strathmore streets this week wearing a pair of overalls and a yellow rainproof coat could be excused for not knowing that it was P. Burns, the millionaire cattle king. Mr Burns has been personally superintending the shipment of a large herd of cattle. He has been quite a frequent visitor to Strathmore during the last few months

Dr. Wright, specialist of Langdon, paid a hurried visit to Strathmore on Friday last in connection with a serious case he has here. The Doctor, not deeming a consultation necessary, advised a change of climate, which advice was acted upon. Latest reports say there is no improvement in the case, though the Doctor was very sanguine at the time of his departure on Monday. More frequent visits, we hope, will be conducive to the best results, for we all like to see the Doctor down here. We might suggest that the above mentioned case was not a case of bodily illness, a medical case, a case of fever, or any other ordinary case, although there was a couple of suit cases in it.—Bon Rev.

[Although our correspondent does not say so, might it not have been a case of love at first sight?—Ed.]

The first issue of the "Brooks Banner" has reached us. It is a neat and newsy paper, and deserves to succeed. It is interesting to remember that less than four years ago there was not a single newspaper published between Calgary and Medicine Hat. Now there are four. The editor of the Banner, Mr Calvin Goss, relapses into poetry occasionally in his columns, a very unusual thing for an editor to do. We have no intention of following his example, our hands being full enough at present

On Thursday and Friday of this week heavy cattle shipments took place, the total for the two days being about 1200. Many cattle were also shipped earlier in the week

Illegal Duck Shooting

At a Police Court held this week before Justice Lambert, Geo. Bryson was sued for \$50 wages by a workman in his employ, and ordered to pay

Sam Wright, Geo. Hughes, and John Schuster, were each fined \$8 and costs for shooting ducks out of season. This is considered rather a light sentence in a case of this kind, and any others brought up on a similar charge will find it stiffer

Election Notices

TO THE
Electors of the District of Glendon

GENTLEMEN,
Having been nominated a Candidate to contest the Glendon Constituency in the Interim Liberal Party, I take this opportunity of conveying to you my thanks for the honor which you have conferred upon me. The nomination was wholly unexpected on my part, and in making that my name would be brought before the convention was a few days ago when several friends approached me and asked if I would accept a nomination. I gave assent after much thought and hesitation, feeling that there were others in the constituency more qualified than I, but since having been the unanimous choice of the Liberals of the District in convention, I am willing and ready to be your standard bearer, and, if elected, pledge myself to do all in my power to advance your interests.

For the past eighteen years I have been a resident of Glendon District. I have followed the occupation of teaching and farming, which necessitated travelling throughout the country a great portion of the year, and thereby I became acquainted with your present and growing needs. If elected, and by your support I shall be, it will be my one aim according to my best endeavor to look after your welfare and interests.

As you are well aware, a new Government has recently been formed under the leadership of the Honorable A. L. Sifton, being a close supporter and adviser of Mr. Sifton I place in him all confidence in regard to the affairs of the Province in an economical and business-like manner, but I do not pledge myself to support any legislation or policy which I consider to be detrimental to your interest or those of the Province at large.

My constituency is a large one, but I will endeavor to see all the Electors personally. However, should I not have the time or opportunity I nevertheless ask you for your support and hearty cooperation.

Again, Gentlemen, I thank you for the great honor in selecting me as your choice, and trust that I can be of service to you after the coming contest.

Yours faithfully,

HENRY SCOTT.

CHEADLE BUTTES

A great deal of indignation is
being felt at present among the
farmers in Cheadle Buttes district
with regard to the action of Messrs
P. Burns & Co. in pasturing about
the head of cattle there. Com-
plaints are made that they have
been breaking fences and getting
into some of the crops of some of
the settlers who arrived here and have
not got fences in yet say that the
cattle even came up to their doors.
Again, the cattle are eating up
every green thing on the unoccupied
land adjacent to the Buttes, and
making it increasingly difficult for
settlers to get their hay supply. It
is also said that the banks of the
irrigation furrows are being damaged.
The people of the district are de-
manding that the C.P.I.C. should
prevent them from doing so, and
that it seems to be up to the
company to get the cattle re-
moved somewhere where they will
not be an annoyance to settlers.

The contract for the new Hervey
School District schoolhouse has
been awarded to Messrs Barr &
Hill, Strathmore. The schoolhouse
when completed will comfortably
accommodate 30 pupils, while it
will also be useful for meetings of a
literary and social nature.

A meeting of the Ladies' Aid of
the district was held at Mr. B. F.
Jones's this week.

Dangerous Condition

of Serviceberry

Several farmers living on the
north side of the Serviceberry
Creek, about 9 miles north and
north-east of Strathmore, have
drawn our attention to the fact that
the water in the Creek is very high
just now, and that fording it is a
matter of great difficulty and danger.
One farmer who was coming in
with his wife and child the other day
found that the water was above the
dashboard of his machine, and he
considered it a big risk for a woman
and child to be in the water. We had
a number of complaints some of
about the same thing, and it was
stated that the difficulty of
foraging the stream, now that
travellers are confined to the road
allowances, was greater than ever.
This was the means of diverting
considerable trade from Strathmore.
The C.P.R. are erecting a bridge at
present for the benefit of the En-
glish Colony, but it is not yet com-
pleted. At Capt. Gordon's crossing
there is no bridge, and it seems to
be up to the Government to erect
a bridge there. It would be well
to keep this matter to the front during
the coming election.

Dairy Cows

A GOOD OPPORTUNITY OF
PURCHASING

A great many of the farmers in
this community have asked us
the possibility of having dairy cows
for sale this fall. We are sorry to
say that our herd is not sufficiently
large to enable us to spare the
young stock. It is our desire to
increase the herd to two milk cows
and at that time we will have some
for sale. In the meantime, for
those who are desirous of purchas-
ing dairy cows it might well be
communicate with Mr. Wallace, who
has the contract to furnish meat
for the railway cars, a fine class of
English colony north-east of Strath-
more. Mr. Wallace drives his cattle
overland from the High
River district and he has been the
undersigned that he would be
glad to furnish cows at \$40 per
head, l.o.b. at Strathmore and
guarantee them to be good milking
cows. This is an excellent opportu-
nity for those who wish to pur-
chase dairy stock.

W. J. ELLIOTT.

A Bad Mix-Up

A Skookumchuck editor, who
was full of hard cider, got a sale
bill and a marriage tally mixed.
The circulation ran as follows:
"William Smith, the only son of
Mr. and Mrs. Josiah Smith, was
disposed of at public auction, to
Lucy Anderson, daughter of Mr.
and Mrs. Samuel Anderson, on my
farm. One mile out of this place in
process of seventy guests including
the following to-wit: 2 milk cows, 12
head of cattle, 12 head of sheep,
the usual run, averaging 1250
pound on the hoof. The beautiful
house of the bride was tastefully
decorated for the occasion. A
lulky rake, 1 food grinder, 1 set
double harness, newly now, and
just before the ceremony a bunch
of flowers in her hand and look-
ing charming in a gown made
of light spring wagn, 1 boxes of
apples, three ricks of hay, one
grind stone, masculine de sole
trimmed with 1000 bundles of
spuds.

The groom is a well known and
popular young man and has always

stood well in society circles of 12
Berkshire hogs, while the bride is
an accomplished and talented tale
teller of a splendid drome of Poland
China—pedigree furnished if de-
sired.

Among the beautiful presents
were two sets of silver knives and
forks, 1 spring harrow, 1 wheel-
barrow, goat and other articles
too numerous to mention.

"The bridal couple left yesterday
on an extended trip, ten
twelve months time to responsi-
ble parties, otherwise spot
cash, much will be served at the
sale. After this Mr. and Mrs.
Smith will go to keeping house in
their home at the corner of Main
and Dr. R. L. Granby, auc-
tioneer.

The Election

VERY LITTLE DOING YET

The forthcoming election in Glen-
den district necessitated by the
resignation of Mr. E. H. Riley can
hardly be said to be a burning topic
at the present time. To begin with
the date of the election has not yet
been announced, and again the only
candidate who has openly declared
himself is Mr. Harry Scott, the
official Liberal candidate. Mr. Riley
has not declared his intentions since
the recent Liberal convention, and
Mr. Emil Griebach is not taken
into account as a serious factor in
the election result. The only mat-
ter of consequence that has trans-
pired during the week is that there
is a gentleman willing to take up
the Conservative banner, whether
supported by a Conservative nomi-
nation or not. Mr. J. W. Waddy,
secretary of the local Conservative
association, received a letter from
him this week to that effect. Mr.
Waddy states that in every way he
would make a very suitable candi-
date, but that at the present stage
he cannot disclose his name.

Mr. Harry Scott, the Liberal
nominee, was in Strathmore on
Tuesday and Wednesday, but did
not do any active electioneering.

Crops and Weather

Conditions

With every fresh week the crop
outlook for this district assumes a
more favorable aspect. Five weeks
ago it was feared that there would
be very little crop to harvest, but
rain has fallen in more or less de-
gree every week since then, and has
done much to help cereals along.
On Wednesday evening a heavy
rainfall took place, continuing well
into Thursday morning.

The heaviest rainfall of the season
took place on Thursday, and the
prospects at the time of writing
(Friday evening) are for more rain.
Almost every day we hear from
farmers of the district who have
good crops to harvest. Messrs
Max and Johnston state in the
large amount of last year's crop
was high. An index of the crop
conditions of the district is to be
found in the trade done by the local
stores, which depend almost entire-
ly on the agricultural community.
These reports that there is little or
no falling off from the trade done
earlier in the season, and in one case
it was stated that last Saturday was
the busiest day in their history.

In the case of oats the figures
given in the official price list pub-
lished in this paper are apt to be
rather misleading, as the elevators
are offering 50 cents and in some
cases more. This is due to the
large demand on the part of con-
tractors on the new railroads north
of here. As there have been a very
large amount of last year's crop
still in this district, these being held
owing to the low prices offered last
year. This has meant a large
amount of income to those fortunate
and wise enough to hold their oats
last year.

The weather conditions this year,
while they have hit some of the
farmers rather heavily financially,
are stated by many to be a blessing
in disguise, for the necessity of care-
ful farming has been brought home,
and the value of irrigation proved.
Many farmers are also preparing to
embark more extensively in dairy
farming. In connection with this
the Demonstration Farm and
Professor Elliot informs us that
a farmer in the district is pre-
pared to supply cows at \$40 per
head delivered at Strathmore. The farmers
are at present taking great interest
in the Demonstration Farm and
Professor Elliot informed us that
last week he took count of them,
and that the agricultural visitors
totalled 61.

Many of the farmers are at pres-
ent making preparations to turn the
irrigation on to their land this fall.

WE HAVE FOR SALE

exclusively about 10,000 acres of the finest
farm lands in the Irrigated Belt, mostly in the
vicinity of Strathmore.

If its Insurance you want, we have it and the
best you possibly can get. See us before Insur-
ing elsewhere.

Loans given prompt attention at the Lowest
Possible Rate of Interest.

If you have a Good Farm for Sale, list it here.

F. BOND, Clerk.

A Visit to the Canadian Pacific Railway Demonstration Farm

If any one doubts the benefits of irrigation, they have but to visit the C.P.R. Demonstration Farm, Strathmore, to be assured of the immense advantages in the use of water.

ALFALFA

The alfalfa seeded last year came through the winter in fine shape and already the first crop has been harvested and results in the use of a ton to the acre. This is considered splendid for the first crop. The stubble was irrigated as soon as the crop was removed, and at the present time stands about one foot high. It is growing rapidly and the predictions are that it will harvest one and a half tons to the acre at the second cutting. This crop is a special assurance that alfalfa will soon be one of the foremost crops in the irrigated district lying east of Calgary, which means the feeding of enormous numbers of all kinds of stock. It might be mentioned that this crop is growing on land that was never irrigated, which is very encouraging.

BARLEY

Two varieties of barley are grown this year the one two-rowed, or brewing variety, which at the present time stands four to four feet six inches in height with well filled heads four to five inches in length. It is estimated that the crop as it stands will thresh out at least 45 bushels per acre.

The second barley is a white hullless variety from Montana. This variety, as its name implies, has a hullless berry similar to wheat. The absence of the hull is considered a very great benefit in the feeding of hogs and cattle. The crop is maturing in splendid shape and will be harvested in another ten days.

OATS

One variety grown is from seed secured from Mr. Hall, who had the prize oats at the Strathmore seed fair last spring. This oat is six feet in height and is filling well. In common with the rest of the grain crops, it received one irrigation the early part of June. It will make an excellent crop.

A second variety is a Swedish Select oat, from Montana. This crop stands fully five feet to five feet six inches high with a fine stiff straw. In fact, one peculiarity of this oat is the stiff straw which it grows. It is a spreading variety of oat and with the immense heads ought to produce from 70 to 80 bushels per acre.

PEAS

Only one variety of peas is grown, the Wonder. The crop was irrigated once and stands three feet high on the average. It is well past the bloom and will, judging from the numerous pods, produce a splendid crop.

WHEAT

Four varieties of wheat are grown, namely, the Seneca, Stanley, A. Preston and Kubanka. The Seneca wheat is now beginning to turn and produce a fine crop. This wheat has stood well and has the peculiar facility of fully maturing into the straw. The Stanley is a very hard wheat, but is excellent for feeding purposes. It is also purchased in limited quantities for mixing with the hard wheat for milling purposes.

The Stanley A is a new variety of wheat produced by Dr. Saunders, of Ottawa. It is a long-headed, non-bearded variety, and stands five feet high. It has a very luxuriant growth of leaves and stands well. The Preston is another spring wheat originated by Dr. Saunders. It is headed with heads three to four inches long and stands four feet six inches high.

The Kubanka is a very heavy headed wheat with heads four inches long and completely filled. It stands five feet high and indicates a fine crop.

All of the above wheat crops were irrigated once and are excellent in appearance.

RAPE

The rape also shows up wonderfully under irrigation. The stand is from 1 to 2 feet high, and from a piece less than an acre in size, fourteen mature hogs and eight small weaned pigs have been receiving almost their entire food supply for over a month, the additional food being a limited quantity of skim milk night and morning. The rape is cut and fed to the hogs at each meal, and there is enough on the patch to keep them going for two months more.

There are also various experiments with corn, millet, sorghum, etc., that would be interesting to every farmer in the neighborhood. The large bulk crops of oats and barley are looking excellent, and if ever irrigated crops showed up to

advantage they certainly do this year on the Demonstration Farm.

GARDEN

In the Garden Department, the strawberries were, perhaps, the most wonderful crop this year. There is an acre patch of these berries, which were covered about four inches deep with mature leaf fall. During the latter part of March the litter was removed from under the patch and during the latter part of April the balance was removed. Early in May the berries received their first irrigation, and shortly after a profuse bloom appeared. The strawberry season lasted for about four weeks and is just closing. The berries produced, while perhaps not abundant this first year, were large, luscious, and very excellent flavored.

The cabbages and cauliflowers are growing rapidly, and will likely equal the excellent crop of last year. All varieties of roots are doing well though the cool nights of July are making growth rather slow. Early potatoes, onions and beans have been on the market for several weeks and are excellent in quality. Beets, carrots, parsnips and leeks are coming on well and are just large enough for use. Red, white and black currants were produced in excellent quality this year, as were also gooseberries. In fact, these small fruits seem to be admirably adapted to this locality.

It is a splendid thing to see how frequently the farmers of the vicinity drop into the farm to go over the various crops with Sept. Elliott. It certainly augurs well for the future when farmers are so eager to get together to talk over their conditions and to watch the progress and growth of new varieties of crops. During the week of the demonstration, the various crops and to discuss irrigation. The crops of special interest this year are two-rowed barley, hullless barley, Stanley A. Preston, and Kubanka wheat, millet, corn, Swedish select oats, rape, strawberries, asparagus, and last, but not least, the trees. There are 250,000 of these latter which are being grown for the settlers in the Irrigation Block. The box elders are making a wonderful growth this summer and will be ready for the settlers about the end of the season. The intention to furnish these at practically the cost of production.

Unpublish Your Grievances

Mr. W. A. Rotinick, the new and capable editor of the Western Canada Trade Gazette, and formerly of the C.P.R.C. publicity department, directs our attention to a recent issue of the Gazette containing a grievance regarding freight rates sustained by the town of Hilda, and submitted by the editor of the Hilda Herald. As Mr. Rotinick states, his purpose in publishing it is to draw your attention to the fact that we are at all times willing to assist editors in their endeavor to advance the commercial interests of their community.

We are always pleased to ventilate any grievance through our columns. If it has the appearance of being in any way substantiated by facts, and if it is a grievance of a public nature would do well to submit it to us, and we will see that, besides publishing it ourselves, that it receives the attention of the Gazette. However, we in Strathmore do not appear to have many grievances regarding our public services.

The following is the CO-OPERATE HOW MAY WE CO-OPERATE WITH YOU

In the August issue of the Trade Gazette we published at the request of the Hilda Herald an article drawing attention to the necessity of an improved freight service between Calgary and Hilda; shipments accepted as fast freight having taken from 10 to 17 days to reach their destination.

We desire to aid in the solving of the commercial problems confronting the merchants of the west and it is a pleasure for us to reproduce such items as that submitted by the Herald.

If, like the Hilda Herald, you have cause for complaint, advise us and we will endeavor to give it the giving due publicity to the statements you submit.

We wish all wholesalers, retailers, editors, and boards of trade in every town and city throughout the west to avail themselves of our columns.

Your commercial problems are our problems and the greater the publicity given the quicker the solution.

COMMENTS A Distinguished Visitor

ON CURRENT EVENTS

The statements in some of the American papers as to thousands of farmers returning to the States from Canada are being branded by us by the immigration officials, who ought to know what they are talking about. At any rate, they do not know what they are talking about. The majority of the farmers here hail from the States, and every one of them has met with more than pleased at the showing made by the district, in face of the dried weather conditions for seventeen years past. There are only two men that we know of who are recrossing the border, and one of them, after selling his stock, is wishing now that he hadn't done so, and is intending to come back next Spring. The knuckers on the other side will have to get hold of some story so not so easily contradicted before they try their hand again in the endeavor to keep their people on the other side of the boundary.

Many Strathmore people would have the opportunity of meeting Mr. Harry Scott, the Liberal candidate for Gleichen district, for the first time this week. To those who have been in the country for some years, however, his face is a familiar one. Mr. Scott is one of the pioneers of the district, whose perseverance and business ability has enabled him to make good. As he moves on, we will see here this week, he started work at Nakama Farm eighteen years ago with a total capital of \$2. His residence here is in the district, and his constituency as this is Mr. Scott would make an ideal situation, and it is certain that its interests would be as well attended to in the future under him as they have been neglected in the past.

A goodly number of Strathmore people will assemble at the Calgary tonight to hear the speaker of the evening, Mr. W. A. Rotinick, who will be an intellectual treat to hear Sir Wilfrid Laurier speak. At the present moment it is not so much the speaker as the subject that is of interest to the public. The speaker is a man of all shades of political opinion, but he is an enthusiast in the reception of him. In the West politics are looked at in a broader standpoint than in the East, and there is not the same bitterness of party feeling.

If Hilda's comet is to blame for the dryness of the present season, we ought to be thankful that it is not coming back for 75 years.

Bassano is spending over \$100,000 this year on sidewalks. Strathmore, under the government of the present administration, is spending nothing on sidewalks. It has never spent anything on sidewalks. It doesn't seem probable that it will spend anything on sidewalks till the present Council is down and out. It is a good suggestion to the Council that if they do not intend to provide sidewalks themselves they might provide the mats or something of the kind to break the dirt from the one elevation to the other of the private sidewalks that decorate Second Street.

If the sidewalk comes up and hits a man a Jack Johnson punch he should not at once jump to the conclusion that he has a job on. It may be that he has only failed to make the grade at the corner of Brown's store.

It is interesting to note the gush of some of the Calgary papers with regard to one of the boys scouts who visited there Tuesday being a Lord and another a Count. It takes one to know one, and it is a pity to see it, and they comment on the fact of their eating from the same plates, and sharing the rough towels with the others. We wonder whether the Calgary newspapers expected to see the youthful nobles (and their valets) around with them and having a special set of gold-plated dishes for their own personal use. Certainly they were never acquired from personal experience in the Old Country. A man looking for a lord over there in this dress or appearance would be badly disappointed, for in a bunch of men the nobleman would be indistinguishable from the day laborer. The truth of the matter is that, as in this country, the man who has the big show is the man who wants people to believe

A Distinguished Visitor

MR. R. MACKENZIE JOHNSTON, a distinguished Scottish gentleman, and one who holds several important positions in the Government of the United Kingdom, is at present touring the West. On Wednesday morning he was in Strathmore, and paid a visit to the Demonstration Farm. Mr. Johnston is very favorably impressed with Southern Alberta, and while it was pointed out to him that we had not so much to show this year in the way of crops, he replied that one got a better idea of the capabilities of a country when it was judged under unfavorable weather conditions, and that under adverse conditions the country was making a very good showing.

With regard to matters in Great Britain, Mr. Johnston said there were signs of a slight revival in trade, but that matters were not at all what they ought to be. The price of cotton had gone up to a great degree, but there had been no corresponding advance in wages. He believed that the Tariff Commission would help matters very much, but said that many of the people who would benefit most under it were among the hardest to convince. Mr. Johnston is going as far west as Vancouver.

Presbyterian Social

In ordinary circumstances a good heavy rainfall is a welcome sight this year, but the large party who had assembled in Mrs. Bole's lawn on Wednesday evening to take part in the Presbyterian social did not find it so, for it made it impossible to go on with the affair as planned. The social was arranged, and combined with the high school, and the decorations and lanterns with which the lawn was adorned.

After a long period of waiting to see whether the rain was really in earnest, it was decided to transfer the social to the school in Lloyd's Hall. Here a large party assembled, and an enjoyable evening was spent with songs, etc., by various members of the school, which included, cream, cakes, etc., were handed round.

It is unfortunate from the point of view of the social that the rain should have come on when it did, as the event, from the numbers that turned up, promised to be one of the most successful of the kind yet held in Strathmore.

Fever Case Suspected

A WARNING
It has been rumored that there has been a case of scarlet fever existing in a town of which we have no knowledge. This, if it be true, is a health authority. This, if it be true, is a health authority. This, if it be true, is a health authority. This, if it be true, is a health authority.

58.—Whenever a household has reason to believe that anyone in his household is infected with smallpox, diphtheria, scarlet fever, chickenpox, or German measles, he should forthwith call and during the whole period of such illness keep all children to the outside of the house, and of such localities written notice of a size not less than four inches by six inches bearing the name of the doctor in whose house the said house is infected.

59.—When a physician ascertains that any person he has been called to attend is ill with smallpox, diphtheria, scarlet fever, chickenpox, measles or German measles, he should forthwith call and during the whole period of such illness keep all children to the outside of the house, and of such localities written notice of a size not less than four inches by six inches bearing the name of the doctor in whose house the said house is infected.

60.—Where no other or different provision is made herein, whoever publishes or distributes any notice of this sort or neglects to conform thereto shall, upon summary conviction, be liable to a penalty for every offence of not less than two dollars or more than \$50.

that he has money or position. He is a snub pure and simple. The man who has money or position is not a snub pure and simple. The man who has money or position is not a snub pure and simple. The man who has money or position is not a snub pure and simple.

The stories that appear in papers regarding the titled heads of Britain and Europe are usually the most absurd of the funny tales that are told. The "democratic" Americans swallow them whole. The man who has money or position is not a snub pure and simple. The man who has money or position is not a snub pure and simple. The man who has money or position is not a snub pure and simple.

IN PAIN FOR YEARS

"FRUIT-A-TIVES" BRINGS RELIEF.

The Honorable Duncan Cameron, Lieutenant-Governor of Nova Scotia, is his numerous friends throughout Canada well known for his health at the present time, when, after consulting a specialist in Montreal, has retired to the quiet of his country home in Nova Scotia. He is reported to be in the Federal Parliament for many years.

Governor Fraser is an ardent disciple of Isaac Walton. He likes to catch fish—fresh water fish and salt water fish.

D. C. Fraser is one of Pictou county's big men. He is big in stature, big in heart, big in his convictions, and, if I may use the term, big in the affections of all Nova Scotians.

A liberal of the old school, a trenchant speaker, an indefatigable campaigner, a ready fighter, he has, nevertheless, won the love of his strongest political opponents and they will rejoice to see him return to Government House possessing all his old-time vigor and tenacity.

D. C. Fraser is a lawyer by profession, a Presbyterian by religion, and, when in politics, a Grit. He was a member of the Supreme Bench for a short time, and held that honorable position to the great congenial and less arduous office of Lieutenant-Governor.

As an after dinner speaker, Governor Fraser is a gem. He is big in his views, and is a valiant champion of the right of every man to his opinion.

His younger days—the early days of his legal and political career—D. C. Fraser was an ardent upholder of the doctrine of "Fruit-A-Tives." He believed in moral reform, and he practiced moral suasion, and this which was his motto.

As a result of his moral suasion, he has been found very effective for the doctor. "Fruit-A-Tives" is a moral suasion by moral suasion is almost unknown in our law is supposed to be the cure all.

D. C. Fraser is prominent in the Nova Scotia Medical League, and has been found very effective for the doctor. "Fruit-A-Tives" is a moral suasion by moral suasion is almost unknown in our law is supposed to be the cure all.

HOME FROM BURMAH.

Canadian Missionary Tells of Habits of the Kachins.

Part of interest is the story of a missionary's work among the Kachins, the Nat worshippers of Burma as told by a missionary of the British Empire, who is returning to Canada by way of London, and who has been out among the Kachins, a warlike tribe who live near the Chinese frontier, and who are now settling in the British Empire.

The reasons they give for the trinity of misfortune are very amusing.

Nat worship is a very ancient belief, and a very common one, and is the basis of the Kachin's life and this has been the cause of many misfortunes.

When a misfortune small or great happens to a Kachin it is to him a sign that the Nats are displeased with him, and that sacrifice is necessary to avert further disaster.

He immediately goes to a priest who does what must be done to appease the Nats.

The reason is this: The Kachins usually is the sacrifice of a bullock or buffalo. The animal is sacrificed and the priest takes the best portions of the animal to the Nats.

Feeding a new religion to people like the Kachins is no easy task. It is hard for most of us to divorce ourselves from early training and consequent prejudices and to adjust ourselves in a fair attitude to new conditions.

And the inability of the Kachins themselves to a new teaching is made the difficult task of the missionary.

The son of the length of tenure of their old belief, and the hard task of a missionary to change the Kachins' minds when the reasons which the Kachins have for their old beliefs are so strong.

When the creation of the world was told the Great Creator summoned the four races to appear before him. The Kachins, Shans, Chinese and Burmese were the four races.

Chief of each race received a book of laws, and the Kachins received a book of laws, and the Kachins received a book of laws.

Shortly after the Great again summoned the four races to appear before him. Now the three other races had not destroyed their books and by reading them they were able to read the book of laws.

The Kachins, however, had not read their book of laws, and they were unable to read the book of laws.

When the Great again summoned the four races to appear before him, the Kachins were unable to read the book of laws.

ATE UNWISLY?

Sometimes people do, and suffer, because the stomach has to suffer.

NA-DRU-CO DYSPEPSIA TABLETS

relieve the discomfort at once, and help digest the overload. The lever of good living may lead you to a box of NA-DRU-CO Dyspepsia Tablets at once. If you doubt that has stocked them, you need not doubt that we will mail them.

Mailing: Drug and Chemical Co. of Canada, Limited. Montreal, P.Q.

AT THE OUTSET

Young married couples should start their house-keeping career right. Remember, Mr. June-Bride,

GLEICHEN NOTES

C. A. Robinson, the manager of a bank in Twin Falls, Idaho, arrived in Gleichen Sunday afternoon and spent a couple of days looking after his land interests in this district, as well as the interests of several of his friends in that state. Mr. Robinson owns considerable land in the Gleichen district, which he has had worked under lease and shares for the past few years. He makes annual visits here to inspect his farms, and to a reporter stated that he was agreeably pleased to see the crops looking so well as they do, considering the dry season and comparing this country with conditions in several of the states that he has visited this year. He states that some of his crops are very good, and while others are not so good he noticed that the neighbors adjoining had good crops. This he attributed to the different methods employed in tilling the soil and the use of irrigation.

Ezra T. Palmer arrived last week from Salt Lake City, Utah, to inspect the crops of grain on his property about three miles north of town, and will spend a week or more visiting friends in this district. He did not expect to have as big crops this season as in previous years, but was pleased with the crops he has visited. He said he never heard of a country where there were not some drawbacks, and he did not think the people of this district should expect this to be an exception to this rule either. He was pleased, however, to see that this district has not suffered nearly so much as in most of the western states.

It is difficult to guess just how many candidates there will be running in the coming election. They all appear afraid to say out loud that they are out for the honor, save Harry Scott. But then you always could depend upon what Harry says.

The friends of Mr. and Mrs. Bentley, of Hand Hills, extend their sincere sympathy to them in the bereavement of their infant son, Frank George Bentley, who was buried in the Gleichen cemetery by Rev. T. W. Castle, on August 2nd.

As reports of the crop begin to come in there can be no doubt but that the harvest will be much better than most people imagined. Many townfolk have been so troubled to drive around the country to convince themselves of the truth and their reports are invariably that the crops are as well ahead of their expectations.

An organized move has been made to form a boy scout regiment in Alberta.

Mr. and Mrs. Brecken and family have gone to spend a short vacation at Banff.

The elections appear determined to make Harry a great Scott, with M.L.A. attachments, are another month's passes.

The Government long distance telephone line is nearing Gleichen and should be in operation not later than Monday next.

Emil Griesbach states he has no news to give out yet; but he is working like a Trojan just the same. He will sure get some votes.

E. A. Wyndham has been awarded a contract on the C.N.E., and already has sent out a big force of men and teams to Rosebud to start work.

Owing to the continued warm weather the trustees of the Gleichen

public school have ordered that the school will not open until Monday August 20th.

In New York, a man in the last stages of tuberculosis has been cured by taking rattlesnake poison in small doses. All poisons seem to be useful if taken in proper doses.

Under certain conditions the female human form is still disagreeable. Two girls in Spokane were arrested while being knocked in the middle.

Before his glory fades Jack Johnson should make a little side money selling his autograph and locks of his hair.

Emil Griesbach left Tuesday morning to attend a meeting of the United Farmers of Alberta at Red Deer, where a conference will be had with Sir Wilfrid Laurier to discuss several subjects of vital interest to our farmers.

Mr. Davidson arrived from Ontario last Saturday, and spent a couple of days visiting his relatives, Mr. and Mrs. T. Henderson. He was much pleased with his visit to Gleichen and may invest in a farm in this locality.

B. S. Corey, secretary-treasurer of the town council, spent Monday at Red Deer acquiring a knowledge of the by-laws of that town for use in Gleichen, by order of the council.

F. W. Courtney's coal shed, at Cluny, was struck by lightning last Friday and was burned to the ground. By the efforts of himself and neighbors the fire was prevented from spreading further.

The Union Sunday school picnic will be held on Friday, Aug. 12th, at the Bow River. There will be a good program of sports and games provided, and all are invited to join. Teams will leave Crowfoot Street at 9 o'clock that morning.

The Cill has a photograph of a field of wheat belonging to H. J. Prestwich, located about nine miles northwest of town, that is well worth seeing. The photo shows Mr. and Mrs. Prestwich and their three children in the field and the wheat stands up to the top of Mrs. Prestwich's head. P. Nelson who gave us the photo states there is two hundred acres of this wheat and he believes it will average thirty bushels to the acre. This crop has only been partially irrigated and speaks well for what can be done in a dry season.

Thos. Henderson left Monday for Edmonton to transact important business.

Jas. Polson the Dominion Government immigration agent at Winnipeg spent Monday in Gleichen. He took a drive around the country and purchased 500 sheaves of winter wheat from F. W. Cranford to exhibit at the Toronto exhibition, and arranged for another 500 sheaves to be used in other exhibits. This should help bring Gleichen to the front.

SCOTT AND RILEY COMPARED

(CALGARY MORNING ALBERTA)

The Liberals of Gleichen have selected a very able candidate to contest the vacancy in the legislature. Mr. Scott is a successful rancher from the eastern part of the province. He has been a resident in the riding for a number of years, and has won the confidence of the electors, who selected him as their standard-bearer. Though other good men were in nomination, it is doubtful if, under the circumstances, a stronger man could have been selected.

The riding has been represented from the beginning by residents of Calgary. It is true that Mr. Riley has always been a resident in the riding, but, at the same time, Hillhurst and the other Calgary suburbs should not have been in the Gleichen riding. But for the STRATHMORE REPORTS OF MR. RILEY THE RIDING WOULD HAVE ASSUMED A MORE REASONABLE SHAPE AT THE LAST DISTRIBUTION OF SEATS. The riding is a long and narrow one, half rural and half urban. There is nothing in common between the residents of Hillhurst and people eighty miles east of Hillhurst. Not only have the members been residents of Calgary, but the candidates have always been either residents of Calgary or adjacent to Calgary. It is not surprising, then, that the Gleichen people, in selecting a candidate, should pick upon one who is really of the riding of Gleichen.

Mr. Scott is vigorous, active and intelligent. He has taken an important part in public affairs, and has the confidence of the people who know him. He received the solid support of the country outside of Calgary, and will receive the votes of all parties in the eastern part of the riding, as well as a very fair share of the votes in this part of the riding.

TRAVELER
